An exceptional PhD program* in the exciting, dynamic and interactive research environment of the Institut Pasteur in collaboration with Parisian universities. The PhD program is for students holding a Master's degree (or equivalent) in science, medicine or related fields from a non-French university.

Educational program
• Improving public health and welfare through scientific discovery
• Quest for knowledge beyond the frontiers of biological sciences
• Satisfying scientific curiosity in a dynamic research environment
• State-of-the-art technology platforms
• A three-year salary covering living expenses and social benefits
• Assistance with housing and visas
• Tailored courses and training to high proficiency
• Close scientific supervision
• Interactive environment for collaborations
• Dedicated student club for science and social activities

Application procedure
There are 3 steps in the selection process
• First step: find a host laboratory. Available labs and their projects will be posted on the web site and may be contacted from September 14 to November 2.
• Second step: submit complete application in collaboration with host lab by November 13.
• Third step: short-listed candidates will be invited for an interview at the Institut Pasteur at the end of January 2019, with decisions shortly thereafter.

Practical information
Deadline for application: Nov. 2, 2018
